

no chance to join

Publicado por Draxler Waldi - 29 Oct 2011 07:03

dear friends dear racers

i still have the problem, not to be able to join server1. (the same at server2) i tried different ways. 1st to join the server with ip, as i always did. no. 2nd to join the server with the server list, no. 3rd to join it directly from aplanet website. no. i controled everything with the help of my brother, we even re-installed the whole game, we didn't find any mistake. my internet works properly. when i got some other racers in the right way, i am not the only racer with that problem. neo and potajillo told me the same. my problems appeared when changing from the first version of india to the update.

any solutions in sight?

a very sad and crying big crocodile tears

waldi

Waldi, are you right have instaled the patch for TrackPack F1RS2011-RTP? May be you copy a wrong folder.

You can see rFactorGameDataLocations_F1RS2011_11-18_India

In this folder you must have:

Two folders 11-18_JaypeeRTP and 11-18_JaypeeRTPMP

Ando Two Files 11-18_Jaypee.mas and 11-18_JaypeeMaps.mas

Is all right?

Waldi did you update the trackpack and are you sure you did id correctly?

I hope that the problem will be fixed before tommorow's race.
