Painting Templates:

If you want to paint your car, you can use these PSD (Photoshop) files to do so.

ISI Formula Masters Road (2011):

- [Download](#) - 5/30/2012

You save the file in DDS DXT format (Photoshop plugin required) into data directory:

My DocumentsrFactor2User DataplayersettingsCOMPONENT NAMEVEH NAMEalt.dds

For example, a Nissan GTR skin would be:

My DocumentsrFactor2User DataplayersettingsNissanGTRNGTR_00alt.dds

We currently do not individualize (by user) alternate skins, so you would need to create a 'car set' for each group of friends and copy them into the working directories when needed, or every alternate car skin will always used the same alternates.
